

AASHUTOSH SHARMA

+91-6261616601 ats4219511@gmail.com LinkedIn GitHub

Technical Skills

Languages: C++, Python, JavaScript, TypeScript

Web & Backend: React.js, Next.js, Node.js, Express.js, FastAPI, HTML5, CSS3, TailwindCSS, RESTful APIs, WebSockets

ML & Data: Scikit-learn, Gradient Boosting, Random Forest, Pandas, NumPy

Database & DevOps: MongoDB, MySQL, Docker, AWS, Git, GitHub

CS Fundamentals: DSA, OOP, DBMS, OS

Work Experience

Adagen Tech Lab

May 2025 July 2025

Web Development Intern

- Engineered a full-stack e-commerce platform for a stationery business using React.js, Node.js, Express.js, and MongoDB, supporting end-to-end customer purchase flows.
- Implemented product listing, shopping cart, JWT-based user authentication, and order management reducing checkout friction across the user journey.
- Designed and integrated RESTful APIs handling product catalog and user data operations, enabling clean separation between frontend and backend services.

Projects

SignBridge: Speech-to-Sign Language Conversion System

- Built a real-time, multilingual speech-to-sign language platform enabling accessibility for hearing-impaired users through live gesture visualization.
- Architected a FastAPI backend with WebSocket-based communication achieving low-latency (<200ms) speech processing and real-time sign rendering.
- Engineered a responsive React.js frontend with microphone integration and containerized the full stack with Docker for consistent multi-environment deployment.

MediPred: AI-Powered Disease Prediction Platform

- Developed a full-stack AI healthcare platform predicting diabetes, heart disease, Parkinson's, and mental health risk using 4 trained ML models.
- Trained Gradient Boosting and Random Forest pipelines on curated healthcare datasets, achieving up to **86.9%** accuracy across disease categories.
- Implemented JWT-based authentication, MongoDB data persistence, and personalized health recommendations via a Next.js + TypeScript frontend.

Farmify: Smart Agriculture Management System

- Created a smart agriculture web app for crop scheduling, inventory tracking, and weather-informed farming decisions serving data-constrained rural users.
- Integrated live weather APIs for real-time environmental insights and delivered a responsive React.js + TailwindCSS frontend with a Node.js/Express.js backend.

Education

VIT Bhopal University

B.Tech CSE (2023-2027) | CGPA: **8.64/10**

Kendriya Vidyalaya, Sehore

Class XII (2022) | 91.4%

Kendriya Vidyalaya, Sehore

Class X (2020) | 92.4%

Achievements

- CodeVerse Hackathon 2025** | Top 10 Finalist organized by VIT Bhopal
- Ideathon 2025** | Top 8 Finalist recognized for innovation in applied AI solutions

Certifications

- NPTEL: Machine Learning IIT Madras (2025)
- NPTEL: Marketing Analytics
- Google IT Support Professional Certificate Coursera
