Summary

Computer Science undergraduate at VIT Bhopal (CGPA: **8.66**) with a strong foundation in Data Structures & Algorithms, Operating Systems, DBMS and Computer Networks, backed by **245+** problems solved across LeetCode and GeeksforGeeks. Experienced in building backend services, REST APIs and database-driven systems using Python, C++, Node.js and MongoDB, with a growing interest in database internals, asynchronous system design and backend infrastructure.

Technical Skills

Languages: C++, Python, JavaScript, TypeScript

CS Fundamentals: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, OOP

Web & Backend: Node.js, Express.js, FastAPI, React.js, Next.js, REST APIs, JWT Authentication, Asynchronous/Non-blocking I/O

Database & Tools: MongoDB, MySQL, Docker, Git, CI/CD, Supabase

Problem Solving: 105+ problems solved on LeetCode | 140+ problems solved on GeeksforGeeks

Experience

NextGen Tech Lab

May 2025 – Jul 2026

Web Development Intern

Remote

- Developed a production-ready e-commerce platform using the MERN stack with inventory management, user accounts and order workflows.
- Engineered and integrated **10+ REST API endpoints** for product discovery, inventory filtering and order processing.
- Implemented secure JWT authentication and optimized MongoDB schemas for efficient inventory and user data management.
- Contributed across backend architecture design, API development, frontend integration, testing and deployment preparation.

Education

VIT Bhopal University

Nov 2023 – May 2027

B.Tech Computer Science and Engineering | CGPA: **8.66/10**

Bhopal, MP

Kendriya Vidyalaya, Sehore

Class XII: **91.4%** | Class X: **92.4%**

Projects

Secure Document Exchange Platform

May 2026

Next.js, Node.js, Express.js, MongoDB, Docker, JWT

- Developed a secure document sharing platform supporting controlled access, expiration policies and auditable workflows, patterns directly applicable to handling sensitive financial data.
- Designed modular backend services with JWT authentication and role-based authorization mechanisms.
- Built APIs for document upload, retrieval, access validation and metadata management.
- Containerized backend services using Docker to simplify deployment and portability across environments.

Farmify AI: Smart Agriculture Management Platform

Jan 2026

Next.js, Node.js, Express.js, MongoDB, JWT

- Built a full-stack platform integrating weather intelligence and crop analytics through **8+ REST API endpoints**, designed to serve concurrent users reliably using Node.js's non-blocking, event-driven I/O model.
- Developed a peer-to-peer marketplace and AI-powered assistant with JWT authentication and OTP-based recovery workflows.
- Designed modular backend services with clean API boundaries enabling independent service scalability.

Certifications

- NPTEL Marketing Analytics** – Score: **98%** (Elite + Gold)
- Google IT Support Professional Certificate – Coursera

Achievements

- CodeVerse Hackathon 2025** – Top 10 finalist among 200+ teams.
- Ideathon 2025** – Top 8 finalist among 150+ teams.
- Achieved a peak rating of approximately **2000** on Chess.com.
- Represented Kendriya Vidyalaya Sehore in regional football tournaments twice.
